

## CORE BUSINESS

knowledge in motion

## APPLICATIONS DEVELOPMENT

The reasons businesses should develop applications are to make experiences and interactions simpler and more accessible to end users who need them. Anything from changing user behavior to new internal requirements can be a reason to seek out an application development partner, and it's important to find one that makes it work for both your business and the end user. ZOHL is that type of partner.

*"There's no shortage of remarkable ideas, what's missing is the will to execute them."*  
- Seth Godin
